2) Changes in accounting policies other than 1 ) above: No
3) Changes in accounting estimates: No
4) Retrospective restatement: No
(3) Total number of issued shares (common shares)
5) Total number of issued shares at the end of the period (including treasury shares):

July 31, 2017: 17,464,000 shares
April 30, 2017: 17,464,000 shares
2) Total number of treasury shares at the end of the period:

July 31, 2017: 688,941 shares
April 30, 2017: 717,741 shares
3) Average number of shares during the period:

Three months ended July 31, 2017: 16,752,963 shares
Three months ended July 31, 2016: 16,733,859 shares

* These quarterly financial results are outside the scope of quarterly review procedures.
* Explanation of the proper use of financial results forecast and other notes

The earnings forecasts and other forward-looking statements herein are based on information currently available to the Company and certain assumptions that the Company believes are reasonable, and actual results may differ significantly from these forecasts due to a wide range of factors.

## 4. Overview of Business Results

(1) Explanation of Business Results

Asukanet operates three business areas, each with different positioning and characteristics. They are (1) the memorial design service business, which adds digital processing and remote output services for photos of the deceased to the funeral business that is largely unaffected by economic trends, (2) the personal publishing business, a challenging business which provides ideas for new photo output methods that allow users to create complete photo collections beginning from just a single book, and (3) the aerial imaging business, which is utilizing unique, recently-developed technologies aiming to create a new market and achieve dreams.

Following is an overview of the business results for each segment. The result figures for each segment include internal inter-segment sales.

## (Memorial design service business)

In this business, we achieved strong income from our primary business operation - processing of photos of the deceased, and sales of hardware devices and frames were also strong. We also recorded sales of our AI altar which is a product produced in collaboration with our aerial imaging business.

In terms of expenses, personnel expenses increased as we added more employees. There was also an increase in travel, transportation, and other expenses.

As a result of the above, sales was 564,052 thousand yen ( $104.9 \%$ year-on-year) and segment income was 152,477 thousand yen ( $98.2 \%$ year-on-year).
(Personal publishing business)
This business operates AsukaBook for the professional photographer market and MyBook for the general consumer market.
In the professional photographer market, in addition to gaining contracts through our own marketing activities, we saw sales increase as a result of exhibits at exhibitions, holding AsukaBook seminars, releases of new products, and other measures.

In the ordinary consumer market, we worked to acquire orders primarily among photography enthusiasts and others with a particular interest in personal publishing by means of various campaigns and effective internet advertising. However the competitive environment is harsh and sales to ordinary consumers were below expectations. On the other hand, there was steady growth in sales related to OEM supply as a result of the increasing presence of our services in the market.
In terms of income, we achieved a higher gross profit margin due to factors including a higher operating rate, and were able to appropriately control expenses. The result was a large increase in segment income.
As a result of the above, sales was 793,852 thousand yen ( $115.6 \%$ year-on-year) and segment income was 187,774 thousand yen (142.6\% year-on-year).
(Aerial imaging business)
This business was launched in March 2011, aiming to create a market through new image and video expressions utilizing aerial imaging technologies.

In this business, we are placing top priority on launching mass production of the AI plates which are capable of projecting images in mid-air.
For glass plates, although we have not yet achieved sufficient reduction in costs, we have succeeded in improving the quality of the plates, including large-size glass plates, and have achieved results from exhibitions and a gradual increase in sales primarily for signage applications. For resin plates, we are prioritizing repeated trials using a new production method that has good potential for mass production, and are working towards completing and providing prototypes in preparation for future mass production.
In terms of marketing, we exhibited at the Shop Sales Promotion Expo in Japan in July 2017, and exhibited at 2 exhibitions overseas. In addition, we are planning exhibits for CEATEC in Japan and an exhibition in

Dubai during this fiscal year.
Although the lots for signage applications are small both in Japan and overseas, there has been growth in sales of large-size AI plates and of package products that include the case and sensors. Sales were significantly higher than the same period in the previous fiscal year.
In terms of expenses, there were increases in advertising expenses and travel and transportation expenses resulting from exhibitions in Japan and overseas, as well as an increase in patent application and other expenses.

As a result of the above, sales was 33,224 thousand yen ( $557.9 \%$ year-on-year) and segment loss was 72,351 thousand yen (compared with a loss of 36,204 thousand yen during the first quarter of the previous fiscal year).

As a result of the above segment results, overall sales in all business areas was $1,388,970$ thousand yen (112.9\% year-on-year). In terms of profit, despite an increase in exhibition and other advance expenses in the aerial imaging business, strong growth in the personal publishing business resulted in ordinary income of 142,931 thousand yen ( $105.4 \%$ year-on-year) and net income of 98,263 thousand yen ( $107.1 \%$ year-on-year).
(2) Explanation concerning financial status

Assets at the end of the first quarter of this fiscal year decreased by 133,399 thousand yen from the end of the previous fiscal year to reach $5,191,847$ thousand yen. This was due primarily to a decrease of 74,242 thousand yen in cash and savings resulting from payment of income taxes and dividends, and to a decrease of 40,577 thousand yen in notes and accounts receivable.

Liabilities at the end of the first quarter of this fiscal year decreased by 69,623 thousand yen from the end of the previous fiscal year to reach 652,179 thousand yen. This was due primarily to a decrease of 91,270 thousand yen in income taxes payable and a decrease of 61,100 thousand yen in provisions for bonuses.
Net assets at the end of the first quarter of this fiscal year decreased by 63,776 thousand yen from the end of the previous fiscal year to reach $4,539,667$ thousand yen. Despite recording quarterly net income of 98,263 thousand yen, this decrease was due primarily to payment of 167,462 thousand yen in dividends from surplus.
(3) Explanation of results forecasts and other future predictions

At the present time, there has been no change to the predicted results for the year ending April 30, 2018 that were announced on June 9, 2017.
